

GEORGE MAIJO AGRI

POWER WEEDER WM-990

Safe. Powerful. Practical field cultivation.

7 HP	212 cc	24	2F + 1R
Engine rating	Engine capacity	Blades	Gear drive

Designed for land preparation, de-weeding and intercultivation, the WM-990 combines practical field performance with an open-clutch safety design.

WM-990 — Built for Everyday Farm Work

The George Maijo WM-990 is a compact power weeder designed to reduce manual effort in routine cultivation. Its rotary working system supports soil preparation, de-weeding and intercultivation across suitable agricultural environments.

OPEN CLUTCH SAFETY	MOLDED TYRES
The open clutch design is intended to stop the weeder when the operator releases the clutch, improving control during operation.	Molded tyres provide grip and help improve stability and maneuverability across field conditions.
ANTI-MUD START COVER	ERGONOMIC HANDLE
The anti-mud cover helps prevent dirt and debris from entering the air-filter area, supporting dependable engine operation.	User-oriented handle design supports comfortable control during extended field work.

Technical Specifications

Model	Power Weeder WM-990
Engine & Capacity	7 HP @ 3600 RPM / 212 cc
Engine Type	Vertical / 4 Stroke
Fuel Consumption	0.7 - 0.8 L/hr
Working Width & Depth	1000 / 100 mm & 150 mm
Drive & Gear	Gear drive / 2 Forward + 1 Reverse
Machine Weight	53 kg
Number of Blades	24

Recommended Applications

Land preparation and soil loosening • Weeding operations • Intercultivation between crops • Vegetable and horticulture farming • Garden and general farm maintenance

Why Choose the WM-990?

01	Practical field performance Designed for routine tilling, weeding and intercultivation work.
02	Operator-focused safety Open clutch design helps the machine stop when the clutch is released.
03	Better field control Molded tyres and ergonomic controls support stability and maneuverability.
04	Maintenance-conscious design Anti-mud start cover helps protect the air-filter area from field debris.

IMPORTANT SAFETY & WARRANTY NOTICE

Installation must be carried out only by company-authorized or dealer technicians. Unauthorized installation can void the machine warranty. For installation and service, contact an authorized technician.
