

GEORGE MAIJO AGRI

POWER WEEDER WM 990

Powerful • Efficient • Farm-Ready

PRODUCT OVERVIEW

The **Power Weeder WM 990** is a compact agricultural power weeder designed for efficient field preparation and inter-row weed management. Its 7 HP, 212 cc four-stroke engine, gear drive and 24-blade configuration provide a practical combination of power, working coverage and maneuverability.

## TECHNICAL SPECIFICATIONS

| Specification        | Details                |
|----------------------|------------------------|
| Engine Power & Speed | 7 HP — 3600 RPM        |
| Engine Capacity      | 212 cc                 |
| Engine Type          | Vertical / 4 Stroke    |
| Fuel Consumption     | 0.7 to 0.8 litres/hour |
| Working Width        | 1000 mm                |
| Working Depth        | 100 / 150 mm           |
| Drive & Gear         | Gear Drive             |
| Transmission         | 2 Forward & 1 Reverse  |
| Machine Weight       | 53 kg                  |
| Number of Blades     | 24                     |

## KEY FEATURES

- 7 HP vertical four-stroke engine for dependable agricultural operation.
- 212 cc engine capacity for practical field performance.
- Gear-drive transmission with 2 forward and 1 reverse speeds.
- 1000 mm working width for efficient cultivation operations.
- Working depth of 100 / 150 mm.
- 24-blade configuration for effective soil cultivation.
- 53 kg machine weight for stability and maneuverability.

## APPLICATIONS

Suitable for agricultural field preparation, inter-row cultivation, weed management, soil loosening and general farm maintenance operations.

## AI / OCR DATA EXTRACTION

The brochure uses clear product headings and a structured specification table so OCR, Document AI and retrieval systems can reliably extract the product name, engine, working dimensions, transmission, weight and blade information.
