

SellGrow Master Scope Document

Document Information

Product Name: SellGrow

Version: 3.0 (Master Scope)

Product Type: AI-Powered Digital Business Operating System (SaaS)

Platforms

- Web Application
- Android Application
- iOS Application

Deployment

- Multi-Tenant SaaS
- Cloud Hosted
- Enterprise On-Premise (Optional)

Target Market

- India
- Middle East
- Europe
- USA
- Global SMEs
- Large Enterprises

Executive Summary

SellGrow is an AI-Powered Digital Business Operating System that enables businesses to establish, manage, automate, and scale every aspect of their digital operations from a single unified platform.

Unlike traditional software solutions that require separate applications for websites, product catalogues, CRM, customer communication, AI support, sales, marketing, analytics, marketplace management, and workflow automation, SellGrow integrates all essential business functions into one intelligent ecosystem.

The platform combines Artificial Intelligence, Omnichannel Communication, LiveKit-powered real-time voice communication, CRM, Sales Automation, Marketplace, AI Knowledge Base (RAG), Marketing Automation, Workflow Automation, and Business Intelligence into a scalable SaaS solution.

Vision

To become the world's most intelligent AI-powered Digital Business Operating System enabling every business to sell smarter, communicate better, automate operations, and grow faster.

Mission

Enable organizations of every size to digitally transform their business through Artificial Intelligence, Automation, Omnichannel Communication, and Intelligent Commerce.

Target Customers

Small Businesses

- Grocery Stores
- Retail Shops
- Pharmacies
- Clinics
- Restaurants
- Hotels
- Salons
- Tuition Centres
- Taxis / Autos
- Textiles
- Non Veg Shops
- Training institutes

Medium Businesses

- Manufacturers
- Dealers
- Distributors
- Schools
- Colleges
- Hospitals

Enterprises

- FMCG
 - Automobile
 - Textile
 - Healthcare
 - Pharmaceutical
 - Logistics
 - Banking
 - Real Estate
 - Government Organizations
-

Product Positioning

SellGrow is positioned as an AI-powered Digital Business Operating System that combines

- Website Builder
- Digital Commerce
- CRM
- Sales Automation
- Omnichannel Communication
- AI Customer Support
- AI Voice Platform
- Marketing Automation
- Workflow Automation
- Marketplace
- Business Intelligence

into a single scalable SaaS platform.

Core Platform Architecture

The platform consists of modular services.

1. Business Website
2. Product Catalogue
3. AI Product Assistant
4. Product Experience
5. Sales CRM
6. Customer CRM
7. Omnichannel Communication
8. WhatsApp Business Automation
9. AI Conversational Assistant
10. AI Voice Platform
11. AI Receptionist
12. AI Helpdesk
13. AI Customer Support
14. Broadcast & Campaign Management
15. AI Workflow Automation
16. AI Knowledge Base (RAG)
17. AI Content Studio
18. Email & SMS Marketing
19. Social Media Automation
20. Marketplace & E-Commerce
21. Analytics Dashboard
22. Membership & Subscription
23. Admin Panel
24. Super Admin

Module 1

Business Website

Includes

- Home
- About

- Products
 - Services
 - Gallery
 - Videos
 - Careers
 - Testimonials
 - Blogs
 - Contact
 - SEO
 - Google Maps
 - Lead Forms
 - Multi-language
-

Module 2

Product Catalogue

- Unlimited Products
 - Images
 - Videos
 - PDF Brochures
 - Variants
 - Specifications
 - Warranty
 - Downloads
 - Related Products
-

Module 3

AI Product Assistant

- Product Q&A
- Voice Conversation
- Product Comparison
- Installation Guide
- Troubleshooting
- Recommendations

- Multi-language AI
-

Module 4

Interactive Product Experience

- 360° View
 - Video Gallery
 - AI Chat
 - AR Preview (Future)
 - Request Demo
 - Appointment Booking
-

Module 5

Sales CRM

- Leads
 - Sales Pipeline
 - GPS Tracking
 - Visit Reports
 - AI Meeting Summary
 - Buying Probability
 - Sales Targets
 - Revenue Dashboard
-

Module 6

Customer Relationship Management

- Customer Profile
- Communication History
- Purchase History
- Documents
- Payment History

- Customer Timeline
 - Lead Scoring
 - Follow-up Tracking
-

Module 7

Omnichannel Communication Hub

Unified Inbox

Supports

- WhatsApp Business
 - Instagram
 - Facebook Messenger
 - Telegram
 - Website Live Chat
 - Email
 - SMS
 - Voice Calls
-

Module 8

WhatsApp Business Automation

- AI Auto Reply
 - Interactive Menus
 - Product Catalogue
 - Order Tracking
 - Payments
 - Appointment Booking
 - Broadcast
 - AI Chat
-

Module 9

AI Conversational Assistant

- GPT
 - Claude
 - Gemini
 - Context Memory
 - Human Handoff
 - AI Reply Suggestions
 - Conversation Summary
-

Module 10

AI Voice Platform

Powered by **LiveKit**

Features

- AI Receptionist
 - AI Voice Agent
 - Incoming Calls
 - Outgoing Calls
 - Speech-to-Text
 - Text-to-Speech
 - Voice Activity Detection
 - Call Recording
 - Call Summary
 - Human Transfer
 - Multi-party Rooms
 - SIP Support (Future)
-

Module 11

AI Receptionist

- Appointment Booking
- Customer Registration
- Enquiry Routing

- Meeting Scheduling
 - Call Routing
-

Module 12

AI Helpdesk & Customer Support

- Ticket Management
 - SLA Tracking
 - Knowledge Base
 - Smart Routing
 - Complaint Management
 - Warranty Support
 - Installation Support
 - Technical Support
-

Module 13

Broadcast & Campaign Management

Channels

- WhatsApp
- Email
- SMS
- Facebook
- Instagram

Features

- Audience Segmentation
 - Scheduled Campaigns
 - Delivery Reports
 - Click Analytics
 - Open Rates
-

Module 14

AI Workflow Automation

Visual Workflow Builder

- IF/ELSE
 - Delay
 - Webhooks
 - API Calls
 - CRM Updates
 - Calendar
 - Voice Calls
 - Database Actions
-

Module 15

AI Knowledge Base (RAG)

Upload

- PDF
- Word
- Excel
- Websites
- FAQs
- Product Manuals
- Company Policies

Supports semantic search using vector databases.

Module 16

AI Content Studio

Generate

- Blogs

- Emails
 - WhatsApp Messages
 - Product Descriptions
 - SEO Articles
 - Landing Pages
 - Video Scripts
 - Sales Proposals
-

Module 17

Email & SMS Marketing

- Newsletters
 - OTP
 - Promotions
 - Follow-ups
 - Appointment Reminders
-

Module 18

Social Media Automation

- Facebook
 - Instagram
 - LinkedIn
 - YouTube
 - X
 - Google Business Profile
-

Module 19

Marketplace & E-Commerce

- Multi-vendor Marketplace
- Online Store

- Inventory
 - Orders
 - Payment Gateway
 - Vendor Dashboard
 - Commission
 - Settlement
 - Delivery Tracking
-

Module 20

Analytics Dashboard

- Sales
 - Revenue
 - Marketing ROI
 - Customer Behaviour
 - Voice Analytics
 - AI Analytics
 - Campaign Analytics
 - Marketplace Analytics
-

Module 21

Membership & Subscription

- Monthly
- Quarterly
- Annual

Module-based pricing

Module 22

Admin Panel

- Customer Management
 - Billing
 - Users
 - Roles
 - AI Usage
 - Storage
 - Audit Logs
-

Module 23

Super Admin

- Tenant Management
 - Global Analytics
 - Revenue Dashboard
 - Subscription Reports
 - Platform Configuration
-

Technology Stack

Frontend

- React
- Next.js
- Vite
- Tailwind CSS
- TypeScript

Mobile

- Flutter

Backend

- FastAPI (Python)
- Node.js (Microservices)

Database

- PostgreSQL
- MongoDB
- Redis

Artificial Intelligence

- OpenAI
- Claude
- Google Gemini
- Ollama
- LangGraph
- MCP
- Vector Database

Communication

- **LiveKit**
- WebRTC
- WhatsApp Business API
- Meta APIs
- Speech-to-Text
- Text-to-Speech
- Email API
- SMS Gateway
- Push Notifications
- SIP Integration (Future)

Integrations

- Google Workspace
- Google Drive
- Google Calendar
- Zoom
- Google Meet
- Stripe
- Razorpay
- REST APIs
- Webhooks

Cloud

- AWS
 - Azure
 - GCP
 - Docker
 - Kubernetes
 - Amazon S3 Compatible Storage
-

Security

- Multi-Tenant Architecture
 - SSL/TLS
 - Role-Based Access Control
 - OAuth 2.0
 - JWT Authentication
 - Two-Factor Authentication
 - Audit Logs
 - Daily Backup
 - GDPR Ready
 - Data Encryption at Rest & In Transit
-

Future Roadmap

Phase 1

- Website
- Product Catalogue
- CRM
- AI Product Assistant

Phase 2

- Omnichannel Communication
- AI Voice Platform
- AI Receptionist
- AI Helpdesk

Phase 3

- Workflow Automation
- Marketing Automation
- Analytics
- AI Knowledge Base

Phase 4

- Marketplace
 - Dealer Portal
 - Franchise Management
 - API Marketplace
 - AR/VR Product Experience
 - AI Business Copilot
-

Expected Business Benefits

- Single platform for business operations
 - Reduced software licensing costs
 - Improved customer engagement
 - AI-powered sales and support
 - Unified communication across channels
 - Faster decision-making with analytics
 - Scalable multi-tenant SaaS architecture
 - Higher lead conversion and customer retention
 - Automated workflows and operational efficiency
 - Global-ready digital business ecosystem
-

This master structure consolidates the strongest parts of both original documents while removing overlapping sections (CRM, AI Support, Analytics, AI Receptionist, etc.). It provides a single, coherent specification suitable for product planning, development, investor presentations, and enterprise proposals.

That's the right direction.

Based on both documents, I would make **SellGrow** a single **AI-Powered Digital Business Operating System**, not just a website builder, CRM, communication platform, or marketplace. Those are modules within the same product.
